krithik.maran@gmail.com | (513) 968-4728 | <https://www.linkedin.com/in/krithikmaran/> | Mason, OH

EDUCATION

The Ohio State University, College of Engineering

Columbus, OH

Bachelor of Science in Electrical and Computer Engineering

August 2021 – May 2025

- Academic Accomplishments: GPA 3.51, Summa Cum Laude, 5 Semesters on Dean's List
- Relevant Coursework: Software Development & Data Structures, Systems, Discrete Structures & Runtimes, Digital Logic, Analog Systems & Circuits, Microcontroller-Based Systems, Digital Time Signals, Computer Architecture & Design

SKILLS

- Programming: ABAP, SQL Script, Java, JavaScript, C/C++, Python, React.JS, MATLAB, HTML/CSS, Assembly
- Database: HANA, SQL, PostgreSQL, Redis
- Machine Learning: Pytorch, Skorch, Sci-Kit Learn
- Development Environments: SAP GUI, Eclipse, VSCode, Code Composer Studio
- Other: Inductive Automation Ignition SCADA, VHDL

INDUSTRY EXPERIENCE

Cintas Corporation

Mason, OH

SAP Technical Consultant

August 2025 – Present

- Created a RAP application that allowed the Fire team to assign skills to vendors and disable them if they are no longer active.
- Working on automating the process of building construction files to move data from a legacy system to S/4 HANA.
- Improving the sales history realignment program to eliminate performance issues. Also created a table-comparison program to validate millions of results across tables.
- Projected 3 new fields to an existing CDS View to add additional context for Fire service orders.
- Projected a new field to pull service order numbers for the credit memo billing document type with revised logic.
- Designed a Python Pandas program to identify common sources from 7 different CDS View Reports.
- Implemented a new BaDI to remove delimited contracts from Fiori view for business partners.
- Formulated new logic to handle a new Order Reason code in ECC.

Anand PAG

Irving, TX

Associate Consultant

May 2025 – Present

- Developed AMDPs using SQLScript to enhance the performance of complex data processing logic in SAP HANA.
- Designed and implemented CDS Views to support advanced data modeling and expose complex analytical insights directly on SAP HANA.
- Developed and tested complex logic using ABAP, including scheduled jobs for data processing.

Honda Motor Company

Columbus, OH

Capstone Project Team Lead

August 2024 – May 2025

- Integrated a vision application (developed with Aurora Imaging Library) with Ignition SCADA using OPC UA.
- Developed a custom, modular UI to enable Honda employees to interact with the vision system.
- Engineered PostgreSQL databases to maintain historical records for system maintenance and future development.
- Implemented Ignition SCADA Gateway Events to automate data purging and ensure OPC UA data is written to the database.

Elevance Health

Mason, OH

DevOps Intern

May 2024 – August 2024

- Evaluated and built a proof of concept for integrating Argo Workflows into Kubernetes to optimize DevOps team tasks.
- Automated four service health-check tasks using Argo Workflows, reducing validation time from hours to minutes.
- Created an automated system to suspend and resume services in an AWS EKS cluster, facilitating infrastructure maintenance.
- Assessed chaos engineering practices and developed a blueprint for their implementation to improve service reliability.
- Consolidated 15 EKS, MSK, and ElasticCache metrics into a single dashboard using Datadog.

The Ohio State University

Columbus, OH

Undergraduate Researcher

May 2023 – May 2024

- Conducted research through OSU's Department of Welding Engineering with the Los Alamos National Laboratory.
- Built a PyTorch/Scikit-learn neural network to predict laser weld depths and widths based on power and laser travel speed.
- Tuned model hyperparameters with Optuna and integrated one-hot encoding to accommodate different material types.
- Used cross-validation, scaling, and preprocessing techniques in Pandas and Scikit-learn to ensure robust predictions.
- Developed an ensemble learning algorithm to enhance the accuracy of weld predictions by isolating weld nodes.
