

Krithik Maran

krithik.maran@gmail.com | <https://www.linkedin.com/in/krithikmaran/> | krithikmaran.work | Mason, OH

SKILLS

- **Programming:** ABAP, SQL Script, Java/Groovy, JavaScript, Python, HTML/CSS
- **Machine Learning:** Pytorch, Skorch, Sci-Kit Learn, Generative AI, RAG
- **Systems & Infrastructure:** SAP ECC, S4/HANA, BTP, SuccessFactors Incentive Management (SPM), Google Cloud, AWS

INDUSTRY EXPERIENCE

Cintas Corporation

Mason, OH

IT SAP Analyst | Enterprise Solutions Engineer

January 2026 – Present

- Architect, deploy, and support scalable enterprise backend services, utilizing ABAP RAP, advanced CDS Views, and AMDPs to build robust system logic and SAP UI5 integrations.
- Direct the architecture and development of SAP SuccessFactors Incentive Management (SPM) cloud workflows, serving as the primary technical authority overseeing the entire custom codebase and providing production support.
- Pioneered an AI-driven enterprise data migration, implementing Retrieval-Augmented Generation (RAG) pipelines leveraging Google Cloud BigQuery Vector Search and Gemini models to accelerate operations from weeks to hours.
- Engineered targeted Python utilities to resolve ad-hoc data integrity requirements, merging complex data sources, executing customized validation logic, and expanding multi-dimensional records for various use cases.

Cintas Corporation

Mason, OH

SAP Technical Consultant - Contracted via Anand PAG

August 2025 – January 2026

- Led custom enterprise development and system migrations, overseeing the end-to-end architecture of ABAP RAP applications that replicate core business logic to facilitate the legacy-to-S/4HANA migration.
- Managed enterprise data integrity and system performance, taking ownership of resolving bottlenecks in legacy ABAP code.
- Governed core ERP data models and user experience workflows, driving continuous enhancements to Fiori interfaces through advanced CDS View projections and the design of new transactional logic for specialized business requirements.
- Engineered custom Python scripts to accelerate complex data validation, executing cross-system auditing and targeted data corrections to enforce enterprise data integrity.

Anand PAG

Irving, TX

Associate Consultant

May 2025 – January 2026

- Engineered high-performance data processing logic and advanced analytical models in SAP S4/HANA and ECC, utilizing a combination of ABAP, CDS Views, custom AMDPs, RAP applications, and scheduled jobs.

Honda Motor Company

Columbus, OH

Capstone Project Team Lead

August 2024 – May 2025

- Integrated a vision application (developed with Aurora Imaging Library) with Ignition SCADA using OPC UA.
- Developed a custom, modular UI to enable Honda employees to interact with the vision system.
- Engineered PostgreSQL databases to maintain historical records for system maintenance and future development.
- Implemented Ignition SCADA Gateway Events to automate data purging and ensure OPC UA data is written to the database.

Elevance Health

Mason, OH

DevOps Intern

May 2024 – August 2024

- Evaluated and built a proof of concept for integrating Argo Workflows into Kubernetes to optimize DevOps team tasks.
- Automated four service health-check tasks using Argo Workflows, reducing validation time from hours to minutes.
- Created an automated system to suspend and resume services in an AWS EKS cluster, facilitating infrastructure maintenance.
- Consolidated 15 EKS, MSK, and ElasticCache metrics into a single dashboard using Datadog.

The Ohio State University

Columbus, OH

Undergraduate Researcher

May 2023 – May 2024

- Built a PyTorch/Scikit-learn neural network to predict laser weld depths and widths based on power and laser travel speed.
- Tuned model hyperparameters with Optuna and integrated one-hot encoding to accommodate different material types.
- Used cross-validation, scaling, and preprocessing techniques in Pandas and Scikit-learn to ensure robust predictions.
- Developed an ensemble learning algorithm to enhance the accuracy of weld predictions by isolating weld types.

EDUCATION

The Ohio State University, College of Engineering

Columbus, OH

Bachelor of Science in Electrical and Computer Engineering

August 2021 – May 2025

- **Academic Accomplishments:** GPA 3.51, Summa Cum Laude, 5 Semesters on Dean's List
- **Relevant Coursework:** Software Development & Data Structures, Systems, Discrete Structures & Runtimes, Digital Logic, Analog Systems & Circuits, Microcontroller-Based Systems, Digital Time Signals, Computer Architecture & Design
